Class Activity

Supply Chains, Scarcity, and Economic Security

Rishihood Foundation Program

#ApproachingRishihood

Module 2. Part 1.

Class Activity –
Supply Chains, Scarcity, and Economic Security

From My Life to the World: The Journey of One Product

- Today you will **reflect on one product that is important in your daily life**.
- Your task is to think beyond the product itself and trace the people, processes, places, and systems that make it reach you.

What Kind of Product Can You Choose?

- Something you use, consume, or depend on regularly

- It can be:
  - A **high-tech product** (phone, laptop, internet router)
  - An **everyday product** (milk packet, notebook, water bottle, shoes)
  - A **service-enabled product** (food delivery, digital payment, electricity)

- Note:
  - There is no “correct” product
  - The goal is to understand **how many layers of effort and systems lie behind it**

What You Should Reflect On

When thinking about your product, consider:

- **People**
  - Who might be involved? (farmers, factory workers, engineers, drivers, retailers)
- **Places**
  - Where might different parts come from? (cities, states, countries)
- **Processes & Machinery**
  - Manufacturing, packaging, storage, digital systems, logistics
- **Movement**
  - How does it reach you? (roads, ships, rail, data networks)

Your Reflection Must Include

- **The Product & Why It Matters to You**
  - What is it?
  - Why is it important in your life?

- **The Invisible Network Behind It**
  - Who, where, and what systems make it possible?

- **Points of Dependence**
  - What does this product depend on?
    (transport, energy, raw materials, digital systems, international trade)

- **Points of Vulnerability**
  - What could disrupt its journey to you?
    (conflict, natural disaster, shortages, policy decisions, cyber attack)

Take Home: Question To Ponder Upon

- What does this product reveal about how interconnected and fragile the modern world is?
